

How to duplicate your existing app?

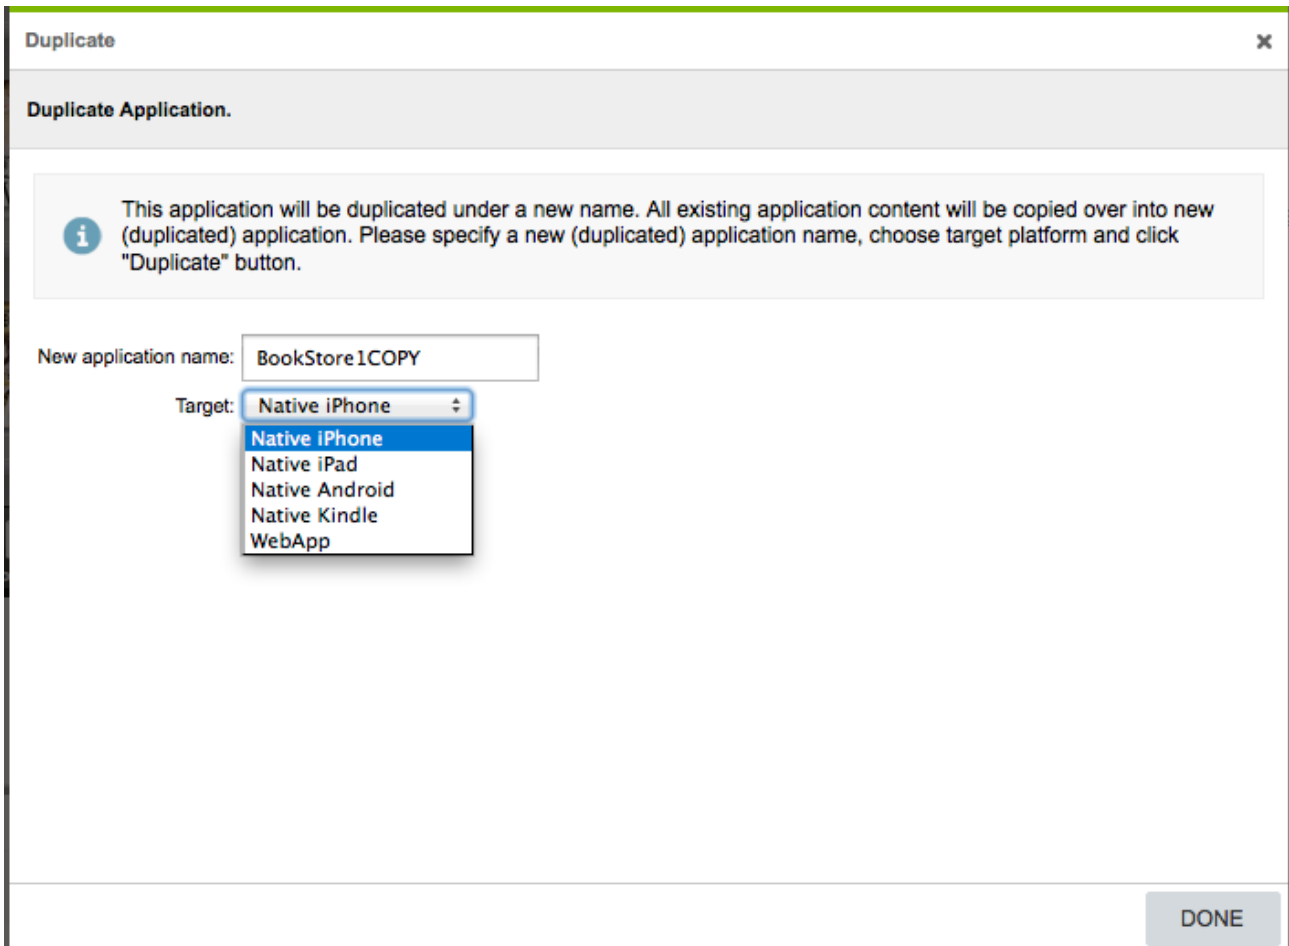

Duplicating an existing app gives you the possibility either to create a back-up application or create an identical application for a different platform.

Below you may find some quick instructions upon how to duplicate your existing application.

- 1) Access your account at SC
- 2) Go to your app's dashboard
- 3) Click the "Duplicate" link

- 4) In the pop-up window select the target (depending on the purposes of duplicating the current application), type in the new app name.

- 5) Click "Duplicate" button -> after you got the confirmation that duplicating the app took place successfully, click on "Done" button within the same window.
